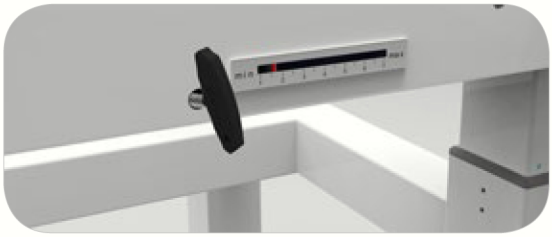
DA VINCI

MADONNA

MANUALLY OPERATED HEIGHT ADJUSTABLE OFFICE DESK

MADONNA double gas springs combined driven system, most save, environmental friendly and ergonomic sit to stand workstations. It is a height adjustable table from a new generation of European design revolution!

Push upward the hand button to locate the height with your comfort .



Maintain an adjustable thrust function
Rotate the handle knob to get your suitable thrust by the dividing ruler.

Fine curved steel foot keeps the minimum space with ground, and provides all round safety for your feet.

Safety power

MADONNA does not require electric power. It brings you safety and convenience.
MADONNA maintains an upward thrust, to prevent speedy sliding down, in order to get anti-collision safety.

Manufactured environmental friendly

Energy saving, without using electric power.
Heat energy, using rivet combination, the most for low carbon welding.
Pay attention to environment, 100% recyclable packing material.

Intelligent human nature

Assembly: within 5 minutes!
Height adjustable function: free up and down at 100mm/s.
Places to use: offices, home use, hotel and any places outdoor.
Thrust adjustable: by using the switch, upward thrust will be provided.
